Group:

1. Look at your group members scenarios and stories and generate a feature list:

Scenarios:

1. Personalized Career Recommendations

Sarah, a junior majoring in computer science, is unsure about her career path. She logs into the UNCC Career Guide, inputs her skills and interests, and receives tailored job recommendations. The system suggests opportunities she hadn't considered, like UX development, and provides a roadmap for skill-building.

2. Job Opportunity Aggregation

Michael, a recent graduate, wants to apply for jobs across multiple platforms. Instead of manually searching LinkedIn, Indeed, and company websites, he uses the UNCC Career Guide, which consolidates relevant job listings in one place, allowing him to apply directly.

3. Skill Development Roadmap

Emily, a first-year psychology student, wants to gain experience in data analysis but doesn't know where to start. The system assesses her current skills and suggests a structured learning path, including online courses, certifications, and internship opportunities.

4. Non-Traditional Career Exploration

David, an engineering major, is curious about transitioning into product management.

The system identifies transferable skills from his technical background and suggests industry-specific projects, networking opportunities, and mentorship programs.

5. Internship Matching

Anna, a sophomore, needs an internship but isn't sure where to look. She inputs her availability, interests, and academic background into the system. The Career Guide matches her with open internship positions that fit her goals.

6. Awareness Stage

Sarah, a college sophomore, receives an email about the Career Guide platform during a campus event. She's curious but unsure how it can help her plan her career. She visits the platform and finds clear messaging about how it can assist her in identifying career paths, skill gaps, and networking opportunities.

7. Onboarding Stage

John, a junior, signs up for the Career Guide platform. He feels overwhelmed by the profile setup process, but the platform offers suggestions for minimal data input, making it easier for him to complete his profile and input his career goals and skills.

8. Exploration Stage

Emily, a senior, logs into the Career Guide platform to explore career paths. She feels overwhelmed by the amount of information available, but the platform provides personalized, AI-driven suggestions for career paths and resources, helping her focus on what's relevant to her goals.

9. Skill Development Stage

Mike, a graduate student, enrolls in recommended courses and certifications through the Career Guide platform. He's uncertain about which skills to develop, but the platform offers interactive tools to track his skill development progress, giving him clarity and direction.

10. Application Stage

Lisa, a recent graduate, uses the Career Guide platform to apply for jobs. She's anxious about her resume and interview performance, but the platform provides real-time feedback on her resume and interview prep, boosting her confidence.

11. Internship Fair at UNCC

Maria is a business administration student at UNC Charlotte. She is attending an internship fair on campus and wants to make the most out of it. Using Career Guide, she prepares by researching the companies attending the fair and saving potential internship opportunities to her dashboard. During the fair, she used Career Guide's networking integration to connect with company representatives on LinkedIn. After the fair, she follows up with the connections she made and tracks her internship applications using the application tracker.

12. Mentorship Opportunities

David, a UNCC alumnus, used to participate in a mentorship program as a mentee, where his mentor would help him navigate the job-hunting process. It was difficult, but having someone experienced in the field helped him. Now that he has graduated and secured a job, he wishes to give back to the community. Since UNCC has introduced Career Guide to students, David decided to enroll as a mentor. Through this, David is assigned to a given number of mentees, can assess students' progress through skill trees and job applications (with their consent), and schedule routine check-ins, all through the system.

13. Career Counseling for STEM Students

Lily, a sophomore in electrical engineering, feels unsure about her career path. She decides to use Career Guide's career counseling feature to seek guidance. She schedules an appointment with a counselor through the platform and prepares by completing a skill assessment. During the session, the counselor reviews Lily's skill tree and suggests relevant courses and extracurricular activities to help her achieve her goals. Lily follows the counselor's advice and tracks her progress using Career Guide.

14. Portfolio Development for Art Students

Kevin is an art major at UNC Charlotte, and he wants to build a strong portfolio to showcase his work for potential employers. He uses Career Guide's portfolio development social network feature to upload his portfolio/details of it and receive feedback from peers and professors, including suggestions from professionals on how it

meets industry standards. Kevin attends career events listed on the Career Guide calendar to network with professionals and present his portfolio.

15. Volunteer Opportunities for Social Work Students

Samantha is pursuing a degree in social work and wants to gain practical experience through volunteer work. She uses Career Guide to search for volunteer opportunities that align with her interests and career goals. The platform provides her with a list of relevant opportunities and allows her to save and apply for them. Samantha uses the networking feature to connect with alumni working in social work to get insights and advice on her career path. She tracks her volunteer hours and receives feedback on her performance through Career Guide.

16. New career path-Major change

Emily is a sophomore, she recently switched her major from chemistry to Computer Science. She is unsure about what job opportunities are available and what skills she needs to have developed. She uses the Career Guide to discover relevant careers, skills, and internship opportunities.

17. Early Undergraduate looking for career paths

Jon is a freshman at UNCC and is overwhelmed by the number of possible career paths. He hears about the Career Guide from a class presentation and decides to explore it. The platform provides a career assessment tool and insights into different industries.

18. Preparing for a career after graduation

Marcus is a senior at UNCC and is graduating in a few months but hasn't finalized his career plan. He visits the Career Guide to find job postings, networking events, and resume building resources to improve his chances of finding a career.

19. Alumni looking for career change

Samantha is a UNCC alumni and has been in the workforce for three years and is now looking for a career change. She logs into the Career Guide to find networking events and alumni success stories to help her find new opportunities.

20. Finding optimal career path

Alex is a junior at UNCC and is unsure about his career path but knows he has valuable skills. He uses the Career Guide to match his skill set with potential careers and connect with industry professionals for advice.

Users Stories:

1. As a student, I want to find internships that align with my skills and interests so that I can gain relevant experience.
2. As a job seeker, I want to build confidence in my career choices so that I can apply to jobs with clarity and motivation.
3. As a student, I want guidance on bridging the gap between my current skills and job market demands so that I can become more competitive.
4. As a student, I want personalized networking suggestions so that I can connect with industry professionals.
5. As a student, I want to explore alternative career paths so that I can adapt to changing job markets.
6. As a student, I want to learn about the Career Guide platform through email and campus events so that I can understand how it can help me with my career planning.
7. As a student, I want clear messaging about the platform's capabilities so that I can decide if it's the right tool for me.
8. As a user, I want to sign up and create a profile easily so that I can start using the platform quickly.
9. As a user, I want the platform to suggest minimal data input so that I don't feel overwhelmed during the onboarding process.
10. As a user, I want to review career paths and skill gaps so that I can understand what I need to achieve my career goals.
11. As a student/alumnus attending a career fair, I want to research companies and save potential internship opportunities to my dashboard, so I can prepare effectively and make the most out of the fair.

12. As an alumnus and potential mentor, I want an easy way to connect to various mentees and assess their progress through skill trees and job applications, so I can provide valuable guidance and support them in their career development.
13. As a student seeking career guidance, I want a simple way to connect with job counselors and assess my skillset in a way that complements my existing progress in job hunting, so I can clarify my career path and track my progress.
14. As a student building a portfolio, I want to receive feedback on my work and get improvement suggestions based on industry standards, so I can create a strong portfolio to showcase to potential employers.
15. As a student seeking volunteer opportunities, I want to search for opportunities that align with my interests, connect with alumni for insights, and track my volunteer hours, so I can gain practical experience and enhance my career prospects.
16. As an alumni, I want to connect with other professionals in my field so that I can expand my career opportunities.
17. As an alumni, I want to learn from success stories so that I can understand different career trajectories available to me.
18. As a junior student, I want a career-matching feature so that I can see which jobs align with my skills.
19. As a junior student, I want to connect with industry professionals so that I can gain insights into different career paths.
20. As a major-changing student, I want to explore career options in my new major so that I can understand the opportunities available to me.

Feature List:

1. Job Opportunity Aggregation – Instead of manually searching multiple platforms like LinkedIn and Indeed, users like Michael can access a centralized job board that aggregates relevant listings. Filters for job type, location, and experience level make the process efficient.

2. **Internship Matching** – For students like Anna, the platform matches their availability, interests, and academic backgrounds with open internship positions, simplifying the search process and ensuring alignment with their career goals.
3. **Testimonials and Case Studies** – Success stories from other students build trust and encourage new users to engage with the platform by showcasing real-world career progress.
4. **Resume and Cover Letter Builders** – Real-time feedback on content, formatting, and keyword optimization helps users like Lisa create strong applications tailored to industry standards.
5. **Networking & Mentorship Hub** – A system that suggests relevant alumni, industry professionals, and networking events, allowing users to build valuable career connections.
6. **Skill Development Roadmap** – A guided learning path recommending courses, certifications, and projects tailored to the user's career aspirations and skill gaps.
7. **Skill Progress Tracker** – An interactive dashboard that allows users to track their skill development progress with gamified elements like badges and milestones.
8. **Personalized Career Planning & Confidence Booster** – A feature that visualizes career trajectories of successful professionals with similar backgrounds, helping students gain confidence in their career choices.
9. **Resource & Opportunity Dashboard** – A dashboard that highlights relevant resources, courses, and networking opportunities, ensuring users can easily access career growth tools.
10. **AI-Powered Career Coach** – A virtual assistant that provides personalized career advice, answers user queries, and recommends next steps based on individual goals and progress.
